# QUICK REFERENCE GUIDE: ELEMENTOR

Child Care

Access the Elementor Settings area. You wont need to use this area much or at all.

Return to this main "Insert Widget" view. Click this after you've finished editing.

These are all Elementor widgets. Hover your mouse over them to see the outline, edit, copy and delete buttons.

Click this to edit Column settings (padding, colors, background, border, etc..). You can also duplicate, delete or resize this column from here. Columns can be dragged to move around.

Search for widgets to insert to your page.

A section is basically a "Row" that contains multiple columns. You can add more columns/ widgets to a section. You can drag sections up and down around the page. You can drag new widgets to sections.

Click and drag these widgets over onto your page.

This is a "Text Editor" widgets. The blue border and buttons are visible when you hover your mouse over it. Click this to edit the text.You can also press the copy button to duplicate it.

Click this to close Elementor and return to the dashboard or page.

Change the screen size (desktop, tablet, mobile) to see how your content will look for different browsers. You can change some Elementor styles based on screen size too!

Access saved templates, insert pre-built content or even save your current page as a template to insert again on a new page later on.

This button turns green when you need to save changes made to the current page. Click this to save.

This appears when you click on a "Text Widget" to edit it. As you change values below it will reflect in the live preview.

This appears when you click on a "Column" to edit it. As you change values below it will reflect in the live preview.

Change between tags here to access additional settings. "Style" lets you change font face, colors and backgrounds. "Advanced" lets you change borders, paddings, margins and other advanced settings. Most widgets have similar tab layout. Toggle between them to see all available options.

You can set background image, color, borders, responsive options and much more for a column.

Normal WordPress text editor is here. Insert any content, media or shortcodes you need.

You can drag a column to a new location, duplicate a column, add a new column next to this one or delete it.
