

# QUICK REFERENCE GUIDE: ELEMENTOR

**Elementor Settings Area:** Access the Elementor Settings area. You won't need to use this area much or at all.

**Search for Widgets:** Search for widgets to insert to your page.

**Widgets to Insert:** Click and drag these widgets over onto your page.

**Close Elementor:** Click this to close Elementor and return to the dashboard or page.

**Screen Size Selection:** Change the screen size (desktop, tablet, mobile) to see how your content will look for different browsers. You can change some Elementor styles based on screen size too!

**Widget View:** Return to this main "Insert Widget" view. Click this after you've finished editing.

**Text Editor Widget:** A section is basically a "Row" that contains multiple columns. You can add more columns/widgets to a section. You can drag sections up and down around the page. You can drag new widgets to sections.

**Text Editor Widget Options:** Click this to edit Column settings (padding, colors, background, border, etc.). You can also duplicate, delete or resize this column from here. Columns can be dragged to move around.

**Text Editor Widget Content:** This is a "Text Editor" widget. The blue border and buttons are visible when you hover over it. Click this to edit the text. You can also press the copy button to duplicate it.

**Elementor Widgets:** These are Elementor widgets. Hover your mouse over them to see the outline, edit, copy and delete buttons.

**Edit Text Editor:** This appears when you click on a "Text Widget" to edit it. As you change values below it will reflect in the live preview.

**Text Editor Advanced Tab:** Change between tags here to access additional settings. "Style" lets you change font face, colors and backgrounds. "Advanced" lets you change borders, paddings, margins and other advanced settings. Most widgets have similar tab layout. Toggle between them to see all available options.

**Text Editor Visual Tab:** Normal WordPress text editor is here. Insert any content, media or shortcodes you need.

**Edit Column:** This button turns green when you need to save changes made to the current page. Click this to save.

**Edit Column Options:** This appears when you click on a "Column" to edit it. As you change values below it will reflect in the live preview.

**Column Drag Options:** You can drag a column to a new location, duplicate a column, add a new column next to this one or delete it.
